General Comments

Monitoring Inspection:

Children and educators were observed engaged in variety of outdoor activities this morning. A group of children were searching for small pieces of ice throughout the outdoor play area to add to their pots and pans to make "soup/potions". Children were observed to take turns on the swing. The mud kitchen was observed to be set up with a variety of interesting materials to encourage digging, pouring, filling and mixing.

The indoor play area is set up with a variety of materials for the children to explore freely. A baby care station has been added to the dramatic play area to support the children's interest in babies.

Documentation of purposeful planning is displayed throughout the indoor and outdoor play environments and clearly illustrates the connections between children's interests, educator observations, planned experiences, and the NB Curriculum Framework.

QA Monitor discussed with educators the large wood bench as it is starting to show some ware; ensure that this removed/replaced when it starts to become a safety concern. The surfacing under the swings and climbing dome requires some raking to ensure it is not compacted in fall zones. Surfacing will require replenishing in the spring.

Handwashing routines were observed during washroom routines.
Monthly fire drills are documented.
Daily attendance records are accurate and reflect all children present. Child-to-staff ratio was observed to be met during Monitoring Inspection.

General Comments
Facility is currently meeting the 50% trained Early Childhood Educators (2/2) requirement.
