General Comments
A Monitoring Inspection was conducted this morning. Children were observed inside, during free play and snack. Operator stated that children are presently interested in books, music, costumes, and magnets. Operator also stated that the children have been enjoying the outdoor environment and that some of their favorite outdoor activities included ride on toys, playhouse, swing, water table, and going on walks. Several forms of documentation were observed – photos, children's artwork, and learning stories. Operator stated that they also use a parent/ family member Facebook group for photos and updates. A documentation binder, full of photos of children taking part in learning / play activities was also observed. Parent Board was observed and all required documentation was present. Updated contact information for Quality Assurance Monitor to be added. Positive child guidance techniques were observed – operator at children's level, operator using positive language when interacting with the children, and operator offering choices and assisting children in decision-making. A conversation was had with operator regarding the front foot path, that leads to the front, main entryway. The pathway is presently beaten down grass. Possible future ideas were discussed, such as adding gravel, mulch, or stones. If this area remains clear, and no safety concerns arise, it can stay as is. Operator to monitor area.
