General Comments

Regular monitoring inspection was performed on this date. All appropriate documentation was posted in a prominent place within the facility.

All rooms were tidy and organized, materials were available to support a variety of play based experiences and reflected the developmental age of the children within each room. Diapering area was well maintained, and diaper procedures were posted.

Infant children and two-year-olds were observing having their afternoon snack. The educators maintained appropriate supervision at all times.

Please ensure that any medicine that is given to children while attending the facility is in a labeled bottle with the dose.

To promote an environment that encourages positive behaviour educators should practice positive reinforcement, encouragement and redirection. Useful strategies can be reviewed within the operator manual under Child Guidance.
