Comments: During the inspection, the inspector observed a master lock secured with a key on the fence latch. Staff explained that the lock had been added to keep the gate closed because it was broken. The inspector informed the educators that locking the gate poses a safety hazard and is not permitted. While on site, the educators immediately removed the lock, and later that day the inspector received an email with a photo confirming that the lock had been replaced with a sliding cabinet lock. Deficiency is now compliant			

General Comments

The inspector observed the children playing freely outside, having their lunch and nap time. The inspector discussed the requirement in staff files with an educator.

The inspector observed that the fire drills and the maintenance of the outdoor play park has not been completed yet for the month of May as of May 29, 2026. An educator advises that it will be done today. The ratio was respected during the inspection.
