<p>General Comments</p> <p>Children were napping when licensing staff arrived. Children slowly began getting up and once awake engaged in play. The youngest child was awake first and offered a snack. The other children have snack time when the school age child arrives so they can all eat together. The operator put sunscreen on all the children before heading outside.</p> <p>More protective surfacing has been added under the swing set for children. A water table was set up on the deck of the cabin providing shade while the children were playing. The youngest child had a car to sit in and watch the other children. The operator mentioned adding a round fenced gate to allow the younger children an opportunity to crawl around and play without the danger of the older children stepping on them while outside. This would serve as an additional play space for infants.</p> <p>The operator has begun to document children's learning and has established a routine that is working well.</p>
