General Comments
Upon arrival, the QAM reviewed the items identified during the previous Monitoring Inspection (MI). Due to ongoing construction at the facility, the outdoor environment could not be assessed at this time. A follow-up visit will be conducted in August, when construction is expected to be completed, to review the outdoor changes. The parent information board was current and up to date. Fire drill records were complete and current. Child-to-staff ratios were observed to be in compliance with regulatory requirements. No concerns were identified in these areas during the visit. The outdoor environment will be reassessed at the next visit.
