Comments: QA Monitor was not screened upon entry to the building and had to inform staff on-site that screening needed to be completed. Preschool children did not wash hands after finishing lunch before heading to a new activity. Appendix E- Parental confirmation and acknowledgment of screening responsibility not completed for children currently in attendance.			

General Comments

Monitoring Inspection- COVID-19 Recovery Phase.

Public health requirements with regards to cleaning and sanitizing being implemented and cleaning schedules evident and completed for both groups.

Educators report to be very comfortable with the cleaning routine and have a toy rotation so that the environment is providing engaging materials for the children at all times.

Recommendation to use the new group log where temperature check is recorded right on the page.

Staff report that current under arm thermometer does not appear to be giving an accurate reading. Ensure that parents are properly screening children and taking their temperature before arrival and a new thermometer- ear or underarm must be purchased. Infrared thermometers are not permitted for children under 12 years of age.

A balance of indoor and outdoor activities observed today. Educators were observed to have responsive and respectful relationships with children. Engaging at their level, asking questions and speaking in a positive and kind manner.

Evidence of activities children have participated in over the summer posted throughout the learning environments and in children's individual binders.
