General Comments Monitoring Inspection: Children and educators observed engaged in a variety of outdoor activities this morning. A group of children with their educator were drawing with sidewalk chalk. Some children were exploring a variety of materials set out by the educators in the upper play area. Educators provided support and supervision as children explored healthy risks, including climbing and balancing. Upgrades to the outdoor play area were noted today - rubber surfacing has been added to the lower outdoor play area; creating a surface that is accessible to all children. Children were not observed in the indoor play area during inspection. An inspection of the indoor play area was conducted. The environment was organized, maintained, and contained invitations prepared for when the children arrive indoors. Purposeful planning is evident through documentation displayed throughout the indoor and outdoor environments. Children are currently interested in bugs and planes. Educators have begun an ongoing project "Creeping, Crawling, and Flying" to support this interest and learning. Handwashing routines were observed during washroom routines. Monthly fire drills are documented. Daily attendance records are accurate and reflect all children present. Child-to-staff ratio was observed to be met during Monitoring Inspection. New staff file (3) review was completed; all required documents are in place. Facility is currently meeting the 50% trained Early Childhood Educators (3/5) requirement
