General Comments
Monitoring Inspection--COVID 19 Recovery Phase.  During monitoring inspection today the administrator reviewed her process of keeping accurate, up-to-date information for the COVID-19 Recovery Phase. Her paperwork was very well organized and easily accessible for licensing to review.  During inspection the separate infant rest area was not set up. Inspectors work with on-site administrator to come up with a solution and rectified during visit. Area is to remain this way until the child/children turn 15 months of age at which time separate sleep space is not required.

General Comments

Educators were observed very engaged with the children, down to their level in play and conversations. Children's documentation is being displayed in binders as well as on the facilities private Facebook page for parents to revisit at their leisure.
