General Comments

A renewal inspection was conducted today.

Children were observed during inside play, morning snack/ lunch, and rest/quiet time. Temperatures during the morning exceeded the -20 windchill, so no outside play was observed in the morning.

A gross motor activity room has been created downstairs in the front of the centre for children to utilize items such as a basketball game, skeet ball and exercise area. A quiet/cozy area has been created downstairs with the addition of a couch and books for children who need or want time to relax in a quieter setting.

The preschool room downstairs/loft area has been transformed into a doctors office on the bottom and a music centre on the top of the loft with a wide variety of musical instruments for the children to interact and engage with.

In the preschool room upstairs, the children's art is displayed in each room as well as documentation supporting the children's learning, from playing in the snow, learning about winter and polar bears. In the block centres, pictures of buildings and creations are displayed on the walls with "Can you create?". Inviting the children to not only build their own creations but to see if they can build like the pictures displayed.

During the inspection the educators were observed down at the level of the children engaged in their learning, play, and conversations. The educators were also observed speaking respectfully and kindly to the children. The children were observed happy and content in their environments and with their educators.
