General Comments

A monitoring inspection was conducted in the morning. Due to a professional development day, no children were in attendance.

The educators were observed preparing the learning environment by reorganizing classroom spaces, adding new materials, and engaging in programming and planning activities. The on-site administrator shared information about a family literacy initiative offered by the facility. Each Friday, families have the opportunity to borrow one of 33 literacy bags across 11 different themes. Each bag contains three storybooks and open-ended materials related to the theme. The administrator explained that the initiative is intended to support early literacy development and encourage family engagement through shared reading experiences.

The indoor play environment was observed to be organized, inviting, and developmentally appropriate. A wide variety of materials and equipment were available and stored on low, open shelving, promoting accessibility and opportunities for independent choice. Inclusive practices were evident throughout the environment, including visual schedules displayed in both English and Spanish to support communication and reflect the diversity of enrolled families.

A random review of child files was conducted. Licensing staff discussed the requirement to ensure that all required child information is updated annually and transferred accurately for returning children to maintain complete and current records.

The Inspector verified Criminal Record Checks and Vulnerable Sector Checks for two staff members.
