Order for Compliance	Regulation	Date to be corrected	Date corrected
32(1) An operator of a licensed facility shall provide indoor play area materials and equipment that are (a) varied and in sufficient quantity for the number and ages of the children receiving services at the licensed facility.	32(1)(a)	Jun 03, 2024	
Comments: The EXP room is disorganized and lacks materials. Ex: The play kitchen area had a small amount of toy food, however, no pots, pans or plates to allow for meaningful play. There were no science-related materials. Limited opportunities to problem solve. There were many shelves in the room that were not being used fully and taking up unnecessary space in the room. It was also mentioned that the room had fewer materials because the educator brought many of her personal items to furnish the room and had returned them home. As discussed, it is not the responsibility of the educators to furnish the rooms. The operator is responsible to ensure that the rooms meet regulation, and the needs of the children are met. The room needs to be cleaned and re-organized and new materials added and materials that are of interest to the children and for their age group.			

General Comments
The Jones room is clean and organized and has material of sufficient quantity and verity for the children. During my inspection, the children were engaged in different activities, including pre-planned activities set up on the tables by the educators. The group then went to the gym and played a game of tag.
The educators were engaged with the children, playing with them and talking with them.
