Comments: Window edges must be cleaned and free of mildew and/or mold. All diapering procedures must be followed.			

General Comments
<p>All groups of children were preparing to go outdoors upon my arrival or finishing up snack.</p> <p>Positive child guidance and nurturing care was observed throughout the morning and in all rooms. I heard positive praise and words of encouragement, patience when children were sad or having difficulties during a transition.</p> <p>Throughout the rooms, hallways and stairwells there is recent art and evidence of children's learning. Programming calendars are also posted.</p> <p>Please ensure that the inspector's annual inspection is pulled out from the plastic sleeve and posted along with the most recent Monitoring Inspection.</p> <p>In the two's room, one educator was changing diapers as children finished snack. Please ensure that the change pad is wiped down with the proper disinfectant. An educator was observed using a Huggies diaper wipe to clean the pad. The child did not wash their hands after they were changed. Please review diaper changing procedures to make sure all steps are being followed.</p> <p>The senior infants were also observed during diaper changing. Children's hands were not being washed after they had their diaper changed.</p> <p>It was observed that the windows in the 2's and 3's rooms have condensation building up in the sills. What appears to be traces of black/gray mold and/or mildew are also present. The window at the downstairs entrance by the two's room also has similar condensation and needs to be cleaned.</p>
