| Order for Compliance | Regulation | Date to be corrected | Date corrected |

General Comments

Educators in each room were engaged with the children in some form at the time of visit. Licensing staff observed educators playing with children at their level, reading to them, and speaking to them and having conversations with them.

The New Brunswick Curriculum Framework is evident throughout in each age group served. There is evidence of the children's learning through learning stories, pictures, artwork and projects. The environments have been changed since last visit to complement a more natural look by purchasing new wooden shelving and furniture. There are many learning centres set up in each classroom to promote learning. The Director has also engaged in writing their own learning stories and getting parent(s) involved by having them write what their children are thankful for and placing it on a thankful tree when you enter facility.

As discussed with the assistant Director, please ensure that the mulch is always raked up to meet the 30 cm of surfacing around the slide in the preschool outdoor play space. The children were not outside at time of visit however this should be completed prior to the children being outside not during. The assistant director stated that they are constantly tilling up the mulch to meet regulation.

Files were in meticulous order and the content could be easily verified by licensing staff.

Licensing staff can recommend facility for licensing.
