General Comments

report, orders for compliance, daily routine, evacuation procedures, life-threatening allergies, name of administrator, name and telephone number of QA Monitor and inspector.

-Administrator and educators hold a valid first aid certificate and a valid CPR certificate.

-Had a discussion with educators about mixing infants with two-year-old, when arriving at the center there was 6 children into the back room and four of them are two. Children younger than 24 months of age are not mixed with other ages. A plan must be put in place to make sure that regulation 10 (7) is always followed. A call will be made to the operator to discuss this matter.

-Room ratio is not respected during nap time, the amount of children napping in the back room exceeds the number of children allowed into that room. Measurements were taken and a plan was made with the educators to move the napping space into the front room. The change will be made tomorrow since all children were napping, a picture showing that the napping room has been moved will be sent to the QAM.

-The gate way to the outdoor space needs to be maintained cleaned, the passage must be maintained so that the door closes and opens easily, a fenced-in space for children to play and explore outside must always be available.

Observations: When arriving at the center children were finishing their lunch, the youngest one was getting ready for a nap. The oldest kids that stayed up some painted, others were playing with blocks and into the dramatic corner.
