General Comments

-Unannounced visit to the center for a monitoring inspection
-Ratio was respected during the visit
-Discussion with educator about their plan on using their fenced in space outside during wintertime. She confirms that they are shovelling the gateway but the last storms the snow was plowed in front of the gate, and they couldn't get in. The educator will find out who is the person cleaning the snow around the building and a better plan will be put in place for next year. Since the snow has melted the fenced in space is now accessible to the children.
-Daily routine into the center includes; Outdoor play time at least once every 4 hour block time, when the weather is permitting. Snacks are served at the recognised hours.
-Toxic products, and cleaning supplies are locked and inaccessible to children
-The outdoor space is well maintained; the doorways are cleaned and provide a safe environment for the children to play and explore. Material is provided for children to play outside.

Observations: When arriving at the center I could see, 5 different kinds of invitation for the children to play, explore and create. Some children were sorting colors with chickpeas, other were walking on a balance beam, building bridges with cups and popsicle sticks, coloring by numbers or playing with a sensory tray. They all sat down to have a snack, they were chatting about sleepovers, their siblings and doing rhymes.
