Comments:			

<p>General Comments</p> <ul style="list-style-type: none"> -Mid-afternoon visit to the establishment for an unexpected monitoring inspection -During the visit, ratio child-to-staff is maintained and respected in the same age and mixed age groups -All required documents are found on the parent board which is posted at the bottom of the stairs in the daycare entrance. -In the preschool room it was observed that documentation is at the children's eye level, which provides opportunities for children to revisit the past experiences and can extend and expand their learning. -In both rooms, evidence of purposeful planning based on children's interest and learning, webbing, invitation, photos and learning stories were posted. -A calendar is used to planned activities with the afterschool kids, it is posted in entrance in the cubbies room. -Children's indoor play area is safe and clean - Material and equipment proposed to children in the indoor play area are easily accessible on low, open shelves. It is varied and in sufficient quantity for all children present. -All preschool kids are having a quiet period, half of them will nap. Cots or mattress who are at least 5cm of thickness needs to be provided for each child. Once the cots or map are received a picture will be sent to licensing staff. -Toxic products, and cleaning supplies are locked under key and are inaccessible to children <p>Observations: When arriving at the center two children were still sleeping and the other half were playing quietly. Once everybody was up, they started working on drawing and doing more active play.</p>
