### General Comments

A Monitoring Inspection occurred this morning, June 12, 2024.

During the inspection, children were observed engaging in outdoor free play. The educator mentioned that the children are currently very interested in being active outdoors, participating in open-ended art projects, and tending to a vegetable garden. Educators were seen using positive language and providing gentle reminders. Outdoors, educators played an active role in children's activities.

Regarding the facility, all required records and documents are maintained for a year. A clearly visible and prominent place is designated for posting the license, current inspection report, current monitoring reports, and orders for compliance. The room is invitingly set up, with materials arranged to encourage children's play. Books have been selected to reflect the children's interests, and children's artwork is displayed at eye level with the child's name and date included. Well-defined learning and play areas were observed, and several pieces of the children's artwork were displayed throughout the facility.

In connection to the curriculum, daily activities are purposefully planned and documented in the program. There are opportunities for both individual and group experiences, and various forms of literacy are present in the indoor environment. The curriculum provides opportunities for children to express creativity, explore the arts and sciences, experience accomplishments, problem-solve, and develop trusting, respectful, and supportive relationships.
