General Comments

On August 13, 2024, a Monitoring Inspection was conducted.

During the inspection, children were observed during indoor free play. Educators demonstrated their commitment to positive child guidance techniques throughout the facility, interacting with children at their level, providing appropriate supervision, using positive language, offering choices, and assisting children in decision-making. Educators also included their own interests in their documentation.

The facility permits parents to enter at any time and ensures that outdoor play occurs for at least one hour within each four-hour block when most children are present, weather permitting. The room is inviting, with materials arranged to encourage play, and the facility is well-equipped with a varied supply of appropriate equipment, materials, books, and toys. It features several well-defined learning centers, including areas for building, reading, dramatic play, and science.

Traffic areas are maintained clean, with outdoor walkways kept free of clutter. Toxic products such as chemicals and cleaners are securely locked and inaccessible to children. Drinking water is provided throughout the day, and outdoor stationary equipment is surrounded by protective surfacing of appropriate depth.

The curriculum offers opportunities for both individual and group experiences, with various forms of literacy present in the indoor environment. Educators also extend the curriculum outdoors and make efforts to incorporate the natural world into the classroom.
