Comments: Deficiency is now compliant			

General Comments

Licensing staff arrived at the centre while the children were engaging in quiet time.

General Comments

When inspecting the outdoor play area it was noted that the mulch was tilled up and replenished.

When licensing staff arrived at the centre, it was noted that the contact information of the licensing inspector was not posted. When this was brought to the attention of the Administrator she posted this while licensing staff was still on site conducting the licensing follow-up inspection.

It was also noted that all cleaning supplies were in a closet that was locked with a key and lock.

Licensing staff also noted that the allergies that are present in the centre were not posted in the food preparation area. When this was brought to the attention of the Administrator she posted the current allergies while licensing staff was still onsite conducting the licensing follow-up inspection.

The educators were very engaged with the children and only positive child guidance was observed while licensing staff was conducting the licensing follow-up inspection.
