### General Comments

Arrived to perform a monitoring inspection. The four and five-year-olds were in the outdoor play space upon arrival and the two and three-year-olds were on a walk with two educators.

The centre is in the process of creating a wild space behind the outdoor play space by planting trees and flowers. The outdoor play space had sufficient materials for all the children present and gave opportunity for a variety of play experiences including gross and fine motor. There was ample shade for the children, and they all had their water bottles available. Positive behaviour guidance was observed at all times.

Classrooms were maintained clean and bright. Each classroom was observed to be well organized with a variety of age-appropriate materials available. Documentation of learning was posted in the hallways through learning stories and pictures. The afterschool program had low resistance exercise materials in the classroom which the children had request and was a nice addition to the space. All classrooms had well defined activity areas and materials were all accessible to children. Representation of English, French and Maliseet language was visible in classrooms.

Ensure that each child is signed into attendance, this should be double checked throughout the day.
