Name of Early Learning and Childcare Licensing Staff Nancy Glendenning		Position Title Inspector	
Order for Compliance	Regulation	Date to be corrected	Date corrected

General Comments

The environment for the children is child lead and educators and the children's interests are made a priority in each age group served. There has been many more learning centres and materials added to the environment especially in the school age area since last inspection. The exercise equipment and the balance beam are newer areas for learning that the children requested to have for their environment. Please ensure that there is more padding put around the balance beam and the proper amount of clearance is given around the equipment so that the fall zone provides a safe place to land.

The pre-planned programming differs from each room however educators are ensuring that the planning is created from the children's interests and the documentation exemplifies this. Journaling, webs, portfolios of children's learning, learning stories, charts, pictures, science predictions, artwork are examples of what was seen on the day of the visit. The educator in the preschool room also stated that they have mystery readers who come in and read to the children from families or the community.

As a best practice and safety for the children please ensure that separate fire drills are completed for the preschool room. This is due to the fact that they are located on a different side of the school.

As discussed, hot coffee or liquids are not permitted around the children even in covered cups.

All documents for licensing purposes were easily verified by licensing staff. They are organized and complete.

Licensing staff can now recommend facility for licensing.
