General Comments
<ul style="list-style-type: none"> -Visit to the center to complete a monitoring inspection. - Ratio was respected during the visit. - The indoor space provides a large variety of material for children to explore, create and play. The space is safe, and the material is well maintained. - I observed that the educators are using positive child guidance technique, they are respectful to each child rhythm and is attentive to their needs. -During the visit I observed improvement into each room, the use of the curriculum has increased in classrooms. A request to the early learning consultant will be sent to bring support into a room where there are struggling to create zones and warmth. -Diaper changing area meets standards. -Add a discussion with the operator and administrator on material that can be added into classrooms to support educators in personalizing their space. -Napping environment meets standards. -During my visit some groups were into free play, others were working with colors, most groups went outside and transition into lunch and nap for the little ones.
