General Comments

Renewal Inspection:

A renewal inspection was conducted during the afternoon hours. School-age children were observed in both the indoor and outdoor environments.

Indoors, children were actively engaged in a variety of activities, including Lego building, coloring, and playing board games alongside their educator. Educators supported engagement and interaction throughout.

Outdoors, educators were observed extending learning opportunities by bringing indoor materials outside. Children participated in activities such as painting, coloring, using playground equipment, playing soccer, and blowing bubbles. The outdoor environment supported both active play and creative exploration.

Documentation was prominently displayed throughout the classroom, as well as maintained within a documentation binder. The documentation was current and accurately reflected the children's ongoing learning and play experiences.

The following records were reviewed: Incident logs, fire drills, monthly review and maintenance plan for all stationary equipment, and daily attendance sheets.

All staff files were reviewed, and a random sample of children's files was also completed.

The facility is recommended for licensing.
