General Comments

- Visit to the facility early in the afternoon to complete the annual inspection.
- Ratio was respected during the visit.

Observations:

- 4-year-old group had just finished eating their lunch. Half of the group went to wash their hands. The other group played a mathematical table game with the educator.
- Educators have created a learning environment that is welcoming and inviting for the children to play, create and to learn and discover their interest-limits.
- Different types of documentation are being used at the center, learning stories, ongoing projects, portfolios and black boards. The documentation demonstrates the children's interest and progress through time. Documentation is posted at the child's level.
- Educators observed to be engaged with children in activities.

Discussion with the operator concerning the exterior parc.

- We recommend that the aqua and raspberry-coloured play structure is not used. Missing surface protection. The operator informs us that this structure is not used by the centre.

- The facility meets all requirements under the Early Childhood Services Act, the license is recommended.
