General Comments

Open ended play materials and equipment are sufficient in quantity providing a variety of experiences for the children in each age group both indoors and outdoors. The daily activities that are implemented at this facility respond to the interests of children while putting their needs first. The programming allows for spontaneous activities and allows for changes in the weather promoting an environment for learning and exploration.

There were many positive child guidance practices observed at time of visit including staff giving gentle reminders to children at their level, helping children use their words, and reflecting with children on their actions. Educators sit with the children during meal time and engage in conversation with them.

Licensing staff was able to easily verify all documentation for licensing as operator is organized and files were easily accessible.

Licensing staff can recommend facility for licensing.
