General Comments

Licensing Staff arrived at the facility to introduce the new Quality Assurance Monitor. Upon arrival, a group of children were playing in the fenced in playground while another group was inside the facility.

The outdoor playground offers a variety of materials for the children to use such as bikes, mud kitchen materials, tires and a wooden playhouse. The Operator was in the process of adding new sand into the large sandbox/mud kitchen area. One group of children were observed using kitchen utensils and play food, while others played on monkey bars and balance bikes. When it was time to go inside, the children worked together to put away the toys before going inside. Proper hand washing was observed as the children entered the classroom.

The classroom was clean, organized and bright. Natural elements such as a fish tank, wooden materials and plants were seen throughout the room. Current learning stories and pictures were posted. Only positive child guidance was observed during today's Monitoring Inspection. Educators were observed sitting with the children to read stories, do puzzles and having snack together. The Educators spoke softly to the children. The children appeared familiar with the morning routine which made for smooth transition periods.
