Comments: Inspector observed that a life-threatening allergy was posted in a visible and prominent area within the centre. Upon reviewing seven child profiles, the inspector noted that this allergy was not recorded in any of the children's health records. An EpiPen for this allergy was present at the centre, despite the allergy not being listed in the child profiles. The operator must ensure that child profiles are updated regularly to reflect accurate health information.			
28(2) An operator of a licensed facility shall carry out emergency evacuation and fire drills monthly.	28(2)	Dec 11, 2025	Dec 11, 2025
Comments: Inspector verifies the monthly emergency evacuation and fire drills and observes that the month of October and November were not completed. Educator explains that it was completed and indicated for the other permit that is in the same building and that it just was not filled out for the license that the inspector is present to complete the inspection renewal. Educator fills out the information immediately. Deficiency is now compliant.
