<p>General Comments</p> <p>A visit was made to facility to complete annual inspection. Ratio was respected at time of visit.</p> <p>Discussed with operator how attendance sheets should be updated to accurately reflect children transferring between rooms throughout the day. When a child moves from one room to another, staff in the sending room should record the child's departure time and indicate the room to which the child is being transferred. Staff in the receiving room should then record the child's arrival time on their attendance sheet. This process ensures that attendance records remain accurate and up to date, allowing educators to maintain an accurate list of the children currently in their care.</p> <p>Some educators have not yet completed the required professional learning hours; however, the outstanding hours are expected to be completed by the licence expiry date of May 31, 2026. A copy of the professional learning hours record will be submitted to the inspector upon completion.</p> <p>During the inspection, I observed children engaged in free play, outdoor play, and lunch routines. Children in the 2 year old room were napping when the inspection concluded.</p> <p>Once professional learning hours are complete, facility will meet requirements under the Act and regulations and license will be recommended.</p>
