39(2) A licensed facility shall have a separate locked storage space that is inaccessible to the children for each of the following: (b) medications.	39(2)(b)	Apr 02, 2025	Apr 02, 2025
Comments: While doing the renewal inspection the Quality Assurance Monitor observed a shelf with Tynenol medication that was not locked. Facility must have a separate locked space for medication. The educator locked the shelf. Deficiency is now compliant.			

General Comments
<p>The Quality Assurance Monitor is on site for the renewal inspection. The ratio was respected during the inspection.</p> <p>The QAM had a discussion with the administrator regarding Advil consents in the childrens files. A facility is only allowed to provide Tynenol for the children, unless the parent brings Advil and signs the consent form. The Administrator informs the QAM during the last monitoring inspection that the parents were in the process of signing the consent forms. The QAM observes today that the consent forms are not in the childs file. The QAM ask the administrator to put the consent in the childrens file in the upcoming weeks.</p> <p>The QAM also observed three children who are 2 years old mixed with an infant. The Administrator informs the QAM that their is no current place to move these children. The QAM informs the administrator that a transition plan must be summited to the department. A transition plan was given to the QAM while on site.</p> <p>During the renewal inspection, the QAM observed the children playing with moon sand and playing in the indoor play area. The children were also observed doing easter crafts and transitioning to the outdoor play area. The children were also observed eating their lunch and transitioning to nap time. In another classroom, children were reading books and signing with the educators. Positive interactions were observed between the educators and the children.</p>
