Comments: During the inspection, a fire drill was conducted. Deficiency is now compliant			

<p>General Comments</p> <p>Licensing staff arrived prior to the children arriving to conduct the renewal inspection. The classroom was clean and organized. Play material was in good condition and children's art projects and photos were on display. Once the children arrived, bookbags and coats were hung up and outdoor shoes were changed. Prior to the children lining up to choose their activity centre, hand washing was observed. Once in small groups, the children were observed making a Mother's Day craft, using perler beads, playing board games, building with blocks and reading in the cozy centre. Later in the afternoon, Educators prepared for snack by playing Heads Up 7Up. The children sat together at the table and when an Educator touched their thumbs, it was their turn to go and get an apple and rice crispy square. Positive child guidance and calm explanations were observed.</p> <p>During the inspection, a fire drill took place. The children and Educators calmly exited the facility and gathered on the walking trail. A head count was observed before returning to the playground and back indoors. The parent board in the main entry as well as upstairs by the classroom contained all required documentation. Child and staff files were verified, and attendance is being logged daily.</p> <p>Licensing staff recommends for renewal.</p>
