General Comments

Upon Licensing staff arrival for the renewal inspection, the children had left for a walk to a local park to have lunch.

While at the park, Educators were observed playing with the children, pushing them on the swings and engaging in conversation. The children's lunch bags and water bottles were organized on a bench and the first aid backpack as well as attendance log were present. An Educator was observed comforting a child after a minor tumble and offering a hug. A non-reportable incident report was completed on site. Positive child guidance and re-direction were noted as Educators were observed speaking with the children at their level. Before leaving the park, there was evidence of routine and boundaries as the Educators were heard saying "1,2,3..." and the children responded, "eyes on you". A headcount was observed, and clear communication between Educators was evident.

The indoor space at the facility was clean and organized. Play material such as Lego, art supplies, bins of open-ended material, were in good condition. Personal belongings were hung up on hooks and children's artwork was on display throughout the room.

During inspection, child and staff files were verified and required documentation was present. The parent board in the classroom was organized with required licensing information. Monthly fire drills and outdoor maintenance safety checks are being completed and logged.

Licensing staff recommends for renewal.
