General Comments
<p>School aged children were not present at time of monitoring visit, as it was during school hours.</p> <p>Observed an abundance of positive child guidance and respectful communication by educators providing children with gentle reminders when needed. Educators were always observed getting down to the children's level when communicating with them.</p> <p>Independence in very much encouraged throughout the classroom. Observed the children having snack, if they had a hard time opening something, the educators would ask the children if they had tried opening it with scissors. Under the educator's supervision, the children would then walk over to where the scissors are kept and attempt to cut open the packaging of their snack.</p> <p>Protective surfacing was not able to be inspected at time of monitoring visit due to the ground being snow covered. A reminder that it is the operator's responsibility to ensure that the outdoor play area is surrounded by a protective surfacing of the appropriate depth. Please refer to section 9.3.2 of the Operator's Manual to maintain compliance. If the protective surface is not at the recommended appropriate depth in the spring, please ensure to add the required amount as soon as possible once the snow melts.</p>
