General Comments
<p>A renewal inspection was conducted today. The children were observed during both inside and outside play. The educator has set up the learning environment based on the interest of the children and the children were observed in the dramatic play area, creative art area, building centre and in the quiet/reading area. Discussed playground at Hampton Elementary School. The swing area, not currently being used by facility, requires mulch. The padding beneath this area is showing, creating a hazard for the children. Also, the zip line, which is not being used by the facility, has frayed causing a hazard. The Childcare Manager indicated that she would discuss with the school.</p> <p>As there are no orders for compliance the facility is recommended for license renewal.</p>
