General Comments

A Monitoring Inspection was completed this afternoon. Children were observed during inside play. Upon arrival, the younger children were observed eating their snacks and playing - dress up, play doh, building with Lego, dollhouse, and drawing. Children were also observed making an icicle craft. Once the older children were done school and on their way to the program, the younger children were split up, some staying in the rooms, and others went to the cafeteria with an educator. In the cafeteria, the children were observed taking part in a variety of activities - Connect 4, Bitzees, stickers, books, and drawing. Back in the classroom, the older children were observed eating their snacks, making Cloud Doh, building with Lego, and drawing. Educators stated that the children were also very interested in learning how to Crochet. Positive child guidance techniques were observed - the rooms were arranged in a way that children can move freely between learning centers, there was an adequate supply of appropriate equipment, material, books, and toys, and educators were observed using positive language.
