Order for Compliance	Regulation	Date to be corrected	Date corrected
39(2) A licensed facility shall have a separate locked storage space that is inaccessible to the children for each of the following: (a) toxic products, chemical products and cleaning supplies;	39(2)(a)	Jul 12, 2023	Jul 12, 2023
Comments: QA monitor noticed a few bottles of shaving cream in the kitchen. There was also a storage room containing chemical products that was only locked with a latch. Toxic products, chemical product and cleaning supplies must be locked by lock and key. Operator immediately transferred the products in the locked cabinet with the others. Deficiency is now compliant.			

General Comments Visit done at the center for a monitoring inspection. Ratio was respected during the visit. During the visit, the Quality Assurance monitor verified: - storage space for toxic products, chemical products and cleaning supplies. - Indoor play area materials and equipment - if children's personal belongings are easily accessible, labelled with the name of the child, only used for the intended child and stored separately for each child. While QA monitor was on site, she was able to observe the children eat snack and play outdoors.
