Comments: Three-Year-Old Room: *White cabinet bottle of Advil inside, not locked. Corrected during inspection. Deficiency is now compliant.			

**General Comments**

A renewal inspection occurred today. The children were observed during outside play, inside play, lunch and quiet/nap time. There is a wide variety of age-appropriate materials for the children to interact and engage with in each of the learning environments. Children's artwork and several learning stories were observed in each of the rooms showing the children's current interests and learning. Educators were observed tending to the needs of the children appropriately, actively engage in their learning and play. Handwashing and diaper changing routines were followed appropriately by all educators. In the outdoor play area (School-Age), mulch to be added under the climbing structure and latch on gate in preschool fenced in area does not latch properly, (fenced requires annual Spring adjustment). Quality Assurance Monitor will follow up on this at the next monitoring inspection.
