

## Early Learning and Childcare Facility Inspection Report

Type of Inspection:  
Monitoring Inspection

Pursuant to section 21 of the *Early Childhood Services Act*, operators of licensed early learning and childcare facilities must post their most recent inspection report in a clearly visible and prominent place in the facility.

| <p><b>General Comments</b></p> <p>During my unplanned visit in the morning, I observed compliance with the ratio. Most of the children were not present during my visit. The following elements are observed during my visit:<br/>         Administrative records maintained on-site.<br/>         Access to a licensed facility: Parents of children present at the daycare are granted entry at any time.<br/>         Rest area: Children sleep on washable, non-absorbent nap mats that are at least 5½cm thick.<br/>         Safety elements: No trampoline is accessible. No kitchen is available. The premises are smoke free, and a first aid kit is on site. Hot beverages are kept in a spill proof container and placed out of reach of children aged 2 years. The pool is not accessible to children at this time.<br/>         Nutrition: Drinking water is available throughout the day. Meals and snacks brought from home are labeled with the child's name and refrigerated as needed. No allergies or intolerances were reported.<br/>         I observed that the child present eats the snack provided by the parents whenever he wishes.</p> |
