General Comments

Licensing Staff arrived at the Facility to perform a Monitoring Inspection. Upon arrival, the children were eating lunch. As the children finished their lunch they were observed building with wooden blocks, playing with cars and creating designs with Perler Beads. Once all the children had finished eating, tables were cleaned, and the floors were swept.

Activities were set out at the tables for the children to pick from. A poppy craft was set up at a table and another table the children gathered to experiment with clay. The Educator was heard encouraging the children to try adding different liquids in with the clay in attempts to make slime. The environment was calm, and Educators were engaged in the activities with the children. Reminders were given to the group before it was time to clean up and get ready to play outside.

The rooms are clean, bright and organized. Pictures of the children and their peers as well as family pictures are displayed throughout the facility. The rooms have lamps and string lights and offer a variety of natural materials. Only positive child guidance was observed. The Educators had open communication with the children and with one another which allowed for clear expectations for the afternoon. Staff files and Incident Reports were easily accessed and reviewed.
