### General Comments

A monitoring inspection occurred today, August 10, 2023, Discussed reportable incident reports as well as supervision and behaviors in the 3- & 4-year-old room.

- Recommending temporarily removing some materials from the room that could cause a child to be hurt.
- Recommending small groupings when possible (half the class go with one educator outside, half stay in with the other, or half go for a walk, half go to the play yard)
- Educators are to position themselves during play, so they are able to intervene quickly if needed.
- Operator and Administrator are to continue to have a presence in all rooms, to support educators and inclusion support workers as needed.
