General Comments

Licensing Staff arrived at the facility to conduct a Monitoring Inspection. Today was a PD Day so the school age children were on site for a full day. Upon arrival, the group had just transitioned from outdoor play back inside the facility. A small group of children were observed coloring hockey, superhero and princess coloring sheets. Another small group of children were in the kitchen area with an Educator making slime and oobleck to add to the large wooden sensory table.

Throughout the morning the children engaged in a variety of activities. One Educator stayed in the gym which allowed the children to freely move from the classroom to the gym area. While in the gym, children were seen playing wall ball, basketball and riding on plasma cars. In the classroom, the children appeared to be enjoying one activity in particular. At a table an Educator had set up mop heads on a stand with a large bin of hair accessories such as play hair straighteners, bows, clips, heatless hair curlers and hairbrushes. The children laughed and smiled as they created different hair styles. The transition from activities to lunch time was smooth. The tables were cleaned, and hands were washed before the children sat to eat.

Only positive child guidance was observed during today's Monitoring Inspection. The Educators were heard giving gentle reminders to use walking feet inside and to be gentle with the materials. A list of classroom rules was observed on the wall in the classroom. A conversation was had on site with the Operator to ensure the classroom rules follow positive child guidance techniques.
