Comments: Deficiency is now compliant			

General Comments
Deficiency is now compliant as educator is no longer employed at the facility. During follow-up visit licencing staff noticed some issues throughout the building. The entrance from the playground to the building was in a very rough state with rotting windowsills and ceiling due to the roof leaking. The common areas such as hallways and stairwells had not been swept or cleaned. The garbage cans in the common areas and hallways had not been emptied, which had resulted in a fruit fly infestation. Air quality was a concern in the building as the air seemed stale due to lack of proper ventilation. Licencing staff took pictures of the premise and reported the issues and concerns to public health to follow up on.
