### General Comments

Regular monitoring inspection was performed on this date. Purposely planned programming was reviewed. This week children are engaged in lady bugs since they have begun seeing them this spring. Children have been learning about their life cycle, have started a garden, planted flowers and had a ladybug sensory bin with magnifying glasses. Children have explored art mediums with ladybug themes which were posted on the wall. Evidence of preplanned programming appears to be improving as weeks have passed. While attempts at program planning were made last month, the last three weeks are well documented. Outdoor play area was observed and was well maintained, educator was observed sitting and reading with a child in a quiet area outside. Pick up time was observed and educators engaged in pleasant conversation with guardians and provided insight into each child's day. Positive behaviour guidance was observed at all times.
