General Comments
<p>A Monitoring Inspection was completed this morning. Children were observed during free play, and lunch. Children had just returned inside, from outside play, at QAM's arrival. Children were observed in the cozy reading area, reading, and looking at their new books. Educator stated that several new books were just added to their cozy reading area. Children were observed washing their hands before lunch. Children were observed sitting at their table, eating their lunches. Educators were observed sitting with the children.</p> <p>The learning / play environment had several well-defined centers - building, dramatic play, cozy reading area, loose parts, light table, and a play garden. Educator stated that the children are presently very interested in construction and food. A restaurant set up was observed, including a fully set play table, chairs, utensils, and food. A play BBQ, bon fire, and chairs were also observed. Several forms of documentation were observed, including children's artwork, photos, and learning stories. The outside play area was also observed, and it contained several play options, some of which included: cars, sandbox, climber, slides, rockers, a rock kitchen, a building area, and several tires. A large blowup fire hydrant sprinkler was also observed, and the children were very excited to tell QAM about this new addition.</p>
