General Comments

The environment is calm and inviting. Educators were continuously engaged with the children both inside and outside. Educators were seen speaking to the children at their level and taking interest in what they were doing. Only positive child guidance was seen at time of visit.

Educators pre-planned program involves a balance of activities and is based on the children's interests. Children's learning is being documented by displayed art work, pictures and learning stories. Educators are keeping portfolios on each child in their care. It was really great to see art being incorporated in the baby room and various forms of materials being used for mark making.

All documentation was organized and complete. Licensing staff was able to easily verify all required documentation for licensing purposes.

Nancy Glendenning spoke to the President of the Board and the administrator of the facility regarding room arrangements and support for the curriculum. Nancy Glendenning will refer facility to the curriculum team for support for these reasons.

Licensing staff can now recommend facility for licensing.
