Full-time Early Learning and Child Care Centre	60	INFANTS PRESCHOOL SCHOOL-AGE
ELCC Licensing Staff	**Position Title**	
Stephanie Hickey	Quality Assurance Monitor	

Order for Compliance	Regulation	Date to be corrected	Date corrected

General Comments

The Quality Assurance Monitor is on site in the morning to conduct a monitoring inspection. The child-to-staff ratio is maintained throughout the visit.

During the visit, 10 child records are audited. The required information is documented in the records reviewed, and all required consents are signed by parents. It is observed that one of the 10 files does not contain the child's immunization record. The administrator contacted the parents during the inspection to obtain the missing document.

The Quality Assurance Monitor verifies that the required information is posted in visible locations throughout the facility.

During the visit, it is observed that all toxic products, chemical products, and cleaning supplies are stored in a separate secured storage area under lock and key and are inaccessible to children.

The Quality Assurance Monitor observes children engaged in free play and child-led activities in the gymnasium. Children then transition from the gymnasium to outdoor play. Supervision of the children is observed throughout these activities.

A discussion takes place between the administrator and the Quality Assurance Monitor regarding the outdoor play area. Garbage, including empty beverage bottles, paper towels, tissues, and garbage bags, is observed in the outdoor play area. The Quality Assurance Monitor reminds the administrator that the outdoor play area is required to be maintained in a clean condition. The administrator confirms that the outdoor play area will be cleaned and that daily inspections of the play areas will be conducted to help ensure they remain free of garbage.
