General Comments
A Monitoring Inspection was conducted this morning. Children were getting ready for outside play, at QAM's arrival. While outside, children were observed watching the deer, picking pears, mowing the lawn with a children's lawn mower, and digging in the mud pit. Positive child guidance techniques were observed - operator providing the children with choices, operator using positive language, and operator conversing with the children. The indoor environment was observed while the children played outside. Several forms of documentation were observed - children's photos, artwork, and learning stories. Several learning / play centers were observed - arts & crafts, dramatic play, cozy reading area, etc. A conversation was had with operator regarding the children's washroom / diaper storing area. It's a newer addition, and a conversation was had regarding lights and walls. It is recommended that a light be added to the washroom, and that the washroom be finished. An exposed area of installation was observed in the bathroom. This is to be correctly sealed off. It is recommended that diapers be stored away from installation.
