General Comments Monitoring Inspection: Children and educators observed engaged in a variety of activities this morning/afternoon including open-ended art, sensory opportunities, building, music and movement, and outdoor play. A small group of preschool children were observed building a bridge between two tables with popsicles sticks and painter's tape; they were investigating how much weight their bridge could hold. The children had an ice cream treat this morning from a local ice cream shop; every two weeks they participate in a park and ice cream outing however due to heavy rains today a staff member delivered the ice cream to the facility. Purposeful planning is evident through documentation, invitations and materials added to the environments that support the children's current interests (cooking/baking, construction, music, vehicles, ice cream shop, and building). Each educator team has an ongoing project happening within their group. A variety of documentation is displayed throughout the environments and common areas that includes connections to the NB Curriculum Framework. It is evident that the preschool children participate in the documentation process. Handwashing was observed during washroom routines. Monthly fire drills are documented. Daily attendance records are accurate and reflect all children present. Child-to-staff ratio was observed to be met during Monitoring Inspection. New staff file (2) review was completed; all required documents are in place. Incident logs are complete and signed by parent/guardians. Facility is currently meeting the 50% trained Early Childhood Educators (4/6) requirement.
