General Comments Monitoring Inspection: Children and educators observed engaged in a variety of activities this afternoon including painting, drawing, outdoor play, and games. A small group of school-age children in Room 12 were participating in a painting lesson lead by their educator. They discussed different painting techniques, depth, perspective, texture and colour. The preschool children in Room 10 were observed exploring their learning environment freely. Their educator played cooperative games with them during transition times. Purposeful planning is evident through documentation, invitations and materials added to the environments that support the children's current interests (nature, collecting, Lego, vehicles, and sports). Each educator team has an ongoing project happening within their group. A variety of documentation is displayed throughout the environments and common areas that includes connections to the NB Curriculum Framework. Handwashing was observed before snack and during washroom routines. Monthly fire drills are documented. Daily attendance records are accurate and reflect all children present. Child-to-staff ratio was observed to be met during Monitoring Inspection. New staff file (4) review was completed; all required documents are in place. Incident logs are complete and signed by parent/guardians. Facility is currently meeting the 50% trained Early Childhood Educators (1/2) requirement.
