<p>General Comments</p> <p>Arrived at facility and most of the children were playing outside. There have been many more natural components added to the outdoor play spaces. Educators are also bringing materials from the indoor environment to the outdoors. There is a variety of choices and materials, and the children are encouraged to explore their environments.</p> <p>The programming allows for child lead spontaneous activities and allows room for changes in the weather to promote an environment for learning and exploration. Documentation is evident throughout the centre in the form of learning stories, pictures, artwork, and quotes.</p> <p>There were many positive child guidance practices observed at time of visit including staff giving gentle reminders to children at their level, helping children use their words and problem solve while helping them to reflect on their own behaviors and actions. Educators sit with the children during mealtime and engage in conversation with them.</p> <p>Licensing staff was able to easily verify all documentation for licensing as operator is organized and files were easily accessible. Please always verify that all staff have approved first aid and CPR from a recognized provider. The providers are listed on the Work Safe NB site.</p> <p>I can now recommend facility for licensing pending fire and health approval.</p>
